ENVIRONMENTAL POLICY

We are committed to continually:

- **OBEY** and comply with local, national, and international environmental laws and other environmental requirements that pertain to our operations;
- **PREVENT** pollution through the elimination and reduction of waste, and by recycling as much as is possible and practical;
- **IMPROVE** and monitor our environmental action programs, accomplishments, and our Environmental Management System by clearly defining and reviewing our environmental targets and objectives.

This policy is posted throughout each of our facilities, communicated to all employees, and shared with any contractors who could have an impact on our Environmental Management System.
